Javascript	MongoDB	HTML/CSS	Heroku
NodeJS	Mongoose	React	MongoLab
Express	Firebase	JSX	APIs/Documentation

MyMapApp [Javascript, Node, Express, MongoDB, Mongoose, MongoLab, EJS, Bootstrap]

I am the sole developer on this project. Users build up their personal map with all the cities and destinations that they have visited. They can then follow other users' maps to compare each other's destinations. I used an authentication middleware for Node called Passport.js. This project is far from finished, and I will continue to add features to this project. Project available for viewing at <http://mymapapp.herokuapp.com/>

StandardVision Intern - (2015)

StandardVision is a global leader on large-scale architectural media technology, with projects in Shanghai, Dubai, Singapore, and USA. I supported the COO by analyzing domestic markets and creating a report targeting potential business for the company.

Nexenta Intern (2013)

Did market research pertaining to cloud structure and data storage. Helped look into competitors prices and products to compare with Nexenta.

Santa Clara University (2010-2014) Santa Clara, CA

Major: Finance

East China Normal University (2012) Shanghai, China

Fluent in Spanish, French, and English; Intermediate in Mandarin

President of Soccer Club: Santa Clara University (over 150 active members)

Developed Speaker Hardware from scratch as a hobby

Built a Tesla Coil
